News from the Stud

volume 8, issue 1 january 2007

Web Site

If you need it for A.I.

We've got it at www.foxai.com!!

Our web site is continuously being updated to furnish you with the most popular artificial insemination products. We are also changing our shopping cart to provide a faster and more reliable ordering system.

As always we accept M/C ,VISA and Discover for oursecure website or phone orders.

Thank you internet savvy customers for making 2006 our best internet sales year yet!

Testing

In keeping ahead of the pack Fox AI has began to use 100% blood serum testing for the PCR and ELISA test. This differs from the partial PCR testing that has previously been done on the semen. It also allows a faster and more accurate test. In addition to our routine testing we now offer same day testing. Please contact Jeff for additional details and costs.

E-Mail Invoices

To decrese paper usage & waste, Fox AI offers the flexibility of e-mailing your invoices directly to you. This service is available at no additional cost and can be set up by calling our office.

New Genetic Addition

The First Power In Genetics
GENESUS

We are pleased to announce the addition of a new genetic partner at Fox AI.

Genesus is the corporate brand of Keystone Pig Advancement. They are based in Canada with the US Offices in South Dakota. For more information on Genesus visit **www.genesus.net**

We have been speaking with Jim Long over the past few years and began business with Genesus this year with the first delivery of boars in July of 2006. We currently have 53 Genesus boars at stud consisting or 34 Duroc and 19 York.

News from a new customer reports that their conception rates after changing to Fox AI have increased 15% over their previous semen supplier.

Kerry Baxter is their Territory Manager and is the salesman for Iowa, he can be reached on his cell phone at 563-249-0763.
